

ARMITHA JAYAMURUGAN

COMP-SCI UNDERGRADUATE

CGPA: 8.28/10

ABOUT ME

I am passionate about developing software solutions that are efficient, scalable, and user-centric, and I strive to build applications that solve real-world problems while delivering a seamless user experience.

PROJECTS

TRACKFORCE APP

Developed a fully functional mobile application that scans the nearby BLE beacons (iBeacons) to determine your position. This project was done as a part of my summer internship where I learned how the Bluetooth signals were read and converted to distances. I developed this app as a workers' part of the full app. This app was used to guide hospital workers like ward boys and nurses to patients who had requested a service via the sterlo app.

VIDHAI-X

Developed a smart farming application that helps farmers make data-driven decisions for crop planning and market strategy. Utilized Artificial Intelligence and Machine Learning models to analyze historical crop data, weather patterns, and market trends for crop recommendations and price predictions. Designed the platform to improve agricultural productivity and enable more efficient farming practices.

UNIVERSITY EVENT PLANNER

Developed a university event management application to create, organize, and manage campus events efficiently while demonstrating practical applications of Data Structures and Algorithms (DSA). The system uses a relational database to store event schedules and organizer data, and applies algorithmic logic to detect event clustering and scheduling conflicts. The platform helps prevent overlapping events and improves coordination of university activities.

OBJECTIVE

To pursue a Software Engineering internship that allows me to apply my technical expertise in programming and software development, collaborate with experienced professionals, and contribute to building reliable, scalable, and user-focused applications.

EDUCATION

Amrita Vishwa Vidyapeetham

2024-2028

B.Tech in Computer Science and Engineering

BVB

2022-2024

High School

CS Academy

2015-2022

Middle and High school

TECHNICAL SKILLS

- Python, Java, C,
- HTML, CSS, JavaScript
- Data Structures & Algorithms (DSA)
- SQL & Database Management (DBMS)
- Object-Oriented Programming (OOP)
- Operating Systems Fundamentals

UPCOMING PROJECTS

ASPECT BASED SENTIMENT ANALYSIS OF AMAZON PRODUCT REVIEWS – RESEARCH PAPER

PYTHON | NLP | MACHINE LEARNING | STREAMLIT

- Developed an **Aspect-Based Sentiment Analysis (ABSA)** system to identify product aspects such as battery, camera, display, and performance and classify their associated sentiments as **positive, negative, or neutral**.
 - Implemented an NLP pipeline involving **text preprocessing, TF-IDF vectorization, and multinomial naive bayes** for sentiment classification using amazon product reviews.
 - Built an **interactive streamlit dashboard** for visualizing aspect-wise sentiment distributions and customer opinions, with ai-based review summarization.
-

WORKING EXPERIENCE

2026 SUMMER

INTERNSHIP IN MOBILE APP DEVELOPMENT

STERLO

- Worked on the backend logic of the TrackForce App integrating databases with real-time changing distances of moving targets and accurately calculating the distance of the person from the beacons using location/coordinate tracking and RSSI signals.
-

EXTRACURRICULAR ACTIVITIES

National Service Scheme (NSS) – Active Member/Volunteer

- Participated in community service initiatives and outreach programs.
 - Assisted in organizing and executing social awareness and community-development activities.
 - Collaborated with student volunteers and faculty to conduct Drug Abuse Awareness Marathon, Blood Donation Camp, Eye Checkup Camp and volunteered in improving a Government School as a way of giving back to society.
-

LANGUAGES KNOWN

- TAMIL (Native)
- ENGLISH
- JAPANESE (Beginner)
